Objective

Results-driven Frontend Developer with 1+ years of experience building scalable web applications and 2 years of graphic design expertise. Skilled in JavaScript, React.js, Redux, Next.js, TypeScript, HTML5, and CSS3, with a passion for optimizing user experience, solving customer pain points, and improving development practices.

Experience

Mindkosh Technologies Pvt. Ltd

01-05-2023 -

Frontend Developer

- Developed an issue-tracking system with real-time chat in React/TypeScript, enabling seamless collaboration on annotated images and point cloud files.
- Built reusable UI components, including filterable data tables, drag-and-drop functionality, and an export feature, improving workflow efficiency.
- Implemented an interactive analytics dashboard using Chart.js, enhancing data visualization and user insights for better decision-making.
- Optimized performance and accessibility, reducing load times and improving UI responsiveness by debugging and refactoring the codebase.
- Collaborated with designers and backend teams, integrating APIs and ensuring a consistent, high-quality user experience across the application.

Hevlet Media

01-11-2020 - 15-04-2023

Graphic Designer (Freelance)

- Designed SEO-optimized websites with strong graphic design, tailored to client needs.
- Worked with marketing and development teams to create intuitive UI/UX, enhancing customer engagement.
- Used responsive design and modern web technologies to deliver cross-platform digital experiences.
